

EXCITING NEWS FOR BEBCO CUSTOMERS

Parkline Inc. is pleased to announce the acquisition of the assets and the hiring of the former employees of Bebc Industries, located in Hitchcock, Texas effective on June 30, 2016. Please allow us to assure you from the onset, Bebc isn't going anywhere! Going forward, the same people, contact information, product designs and manufacturing locations will continue to serve your business needs. The legal entity name will change to Parkline as will its relevant business identification and account numbers, but from there it will be business as usual with improvements along the way. Both teams are very excited about this change and we see only positive things to come, particularly in what we can offer you, our clients, as this change brings a much expanded product selection.

Like Bebc Industries, the Parkline team has over 43 years of experience providing high quality, cost effective, custom engineered, solutions for industrial metal buildings. Over these years Parkline has served a diverse group of markets including Power Transmission, Natural Gas, Water, Renewable Energy, General Industry and these markets applications such as; Substation Controls, MCC Bldgs., Analyzer Bldgs., VFD Bldgs., and Switchgear Bldgs., to name a few. Parkline operates a significant fabrication, assembly and systems integration facility located in Eleanor WV, which is approximately 30 miles North West of Charleston along US route 64.

This purchase encompasses all of the Bebc Industrial Housing and Access Solutions product lines which includes: industrial modular buildings and enclosures fabricated from 12 to 18 gauge galvanized steel, stainless steel, aluminum or fiberglass construction and structural steel flooring systems, blast resistant building products, sheds, canopies, industrial duty stairs, ramps and platforms. These products when added to Parkline's product lines of 18 to 24 gauge buildings which may be either site erected or pre-assembled (modular) creates arguably the industry's most diverse and flexible industrial building and access solutions portfolio. Not only do you gain access to a new, lighter gauge product line, but with two significant fabrication, assembly and systems integration facilities, you gain the flexibility of our Eleanor, WV or Hitchcock, TX facilities, depending on your project location and building type. Parkline is positioned to provide exceptional value for projects located from the Central United States and points further west to the Atlantic Coast.

As a customer of Bebc Industries, you can be assured that Parkline will continue to provide you with the highest quality products and customer service that you have grown accustomed to with Bebc Industries. We will be updating the product information and the internet sites over the coming months, but if you have any questions or want to learn more about this new and exciting breadth of offerings, you may contact us at:
